

SILLIMAN UNIVERSITY MEDICAL SCHOOL

The unique and five-star education is further enhanced by the exposure of medical students to real university life experiences in this century old Silliman University campus. With the exception of the medical schools of state universities, the fees are lesser since education is significantly subsidized by the university. Furthermore, the school is situated in the "University Town" of Dumaguete City, dubbed the City of Gentle People, which offers a student-friendly atmosphere and lower cost of living.

DORMITORY SERVICES

STUDENT ACTIVITIES

SILLIMAN UNIVERSITY MEDICAL SCHOOL

SILLIMAN UNIVERSITY MEDICAL SCHOOL

VISION

To become the leading institution in the region in providing quality medical education committed to produce competent physicians who are guided by Christian principles in the provision of excellent health care.

MISSION

To produce medical graduates [a] who can excel in any of the responsible roles as health providers, teachers, researchers, administrators, and social mobilizers in the Philippine health care system; [b] who possess the necessary skills for a lifelong and self-directed learning; and [c] whose caring, compassion and social consciousness emphasize the quality of such education.

CURRICULUM

The Silliman University Medical School has combined the best of traditional and innovative curricula. This is subject-based with PBL teaching innovations and case discussions. Additional subjects of Public Health are integrated. A unique feature incorporated in our curriculum are the Seminars in Medical Professionalism, Spirituality in Medicine, Evidence-based Reproductive Health, Essential Newborn Care and Telehealth.

| Department of Family and Community Medicine | 2 months and 2 weeks |

FACULTY

The faculty members are qualified and 81% of the faculty members have Specialty and 26% of them have Subspecialty qualifications from their respective certifying boards. 48.6% of them have been teaching at Silliman University Medical School for 7–9 years. Similar faculty members are also the Consultant Staff of the base hospital— the Silliman University Medical Center—thus ensuring the continuity of instruction from the medical school to real life situation and vice versa.

Additional faculty members are from the College of Education, Public Health Program, College of Law, Chemistry Laboratory Department and College of Computer Studies. Faculty members from these units are invited through intra-University linkages.

FACILITIES AND EQUIPMENTS

The construction of a multi-million separate Medical School building is a reaffirmation of University's commitment to support the medical education program. The Medical School now is housed in this two-storey building with a floor area of more than 2,400 sq. meters, located at the back of Silliman University Medical Center.

The new Medical School building has both adequate spaces and functional areas. Several CCTV cameras are installed for the security of the facility and safety of students and secondarily, for monitoring the integrity of examination procedure at the testing area.
