## MAPECON Proposal

Setting-up of franchised joint venture Material Recycling and Recovery Facility (MRRF) and other related AGRONOVATION projects.

- The Buildings and Grounds endorses the proposal of MAPECON. Also, may we recommend that SU will have its own MRRF to sustain SU's needs for its Landscape and Organic Farm (Farm to Fork Program)
- SU has plenty raw materials to venture into organic fertilizer production.
- Locations are already identified and estimates are being made in preparation for inclusion on the SY 2019-2020 Annual Budget
- BG collected almost 8,000 cement sacks (230 cu.m.) of compost soil for various campus landscaping projects.
